How To Think About the American Revolution A Bicentennial Cerebration

Harry V. Jaffa

This book is a bicentennial "cerebration" that also marks a milestone in Professor Jaffa's long and devoted attempt to understand the American political tradition as it understood itself. In his interpretation, Jaffa elaborates for the first time the full range of the teaching of the Declaration of Independence. The heart of the Declaration, he argues, is a natural theology. The relationship of the Creator and the God of the laws of nature expresses and justifies the ground of the authority of the people. Nothing, Jaffa maintains, threatens the future of human freedom so much as the failure to keep alive the understanding of, and attachment to, its principles.
